2009

ACHIEVEMENTS

Successfully led the team to deliver projects ahead of schedule.
Multiple times awarded as Sprint Hero.
Winner's of Hackathon, 2019.
Part of Google Club.

Lead Mobile Application Developer with **10+ years of experience** building scalable, high-performance **Android and Flutter applications** across POS, IoT, enterprise, and no-code platforms. Proven expertise in **Jetpack Compose, Kotlin, BLE hardware integrations, custom Android OS (Kiosk devices)**, and leading cross-functional teams. Currently working on **No-Code/Low-Code mobile platforms and GenAI-powered solutions** to accelerate product development and enhance user experience.

WORK EXPERIENCE

Lead Mobile Developer

Vassar Labs

November 2023 - Present

- Led the development team. Team size - 10-15
- Defining architecture of complex problems.
- Closely working on GEN AI solutions.
- Designed and developed No-Code and Low-code mobile platform

Senior Software Engineer, Android

Tray

May 2022 - November 2023
April 2019 - February 2021

- Managed a small team of 3-4 members.
- Developed Android-based Point-of-Sale application which is capable of working on KIOSK and Terminals with custom Android OS.
- Integrated external hardware like EPSON printers, weighing machines, etc.
- Designed and implemented receipt printing where anyone can change the design of the prints without changing a single line of code (configuration-based).
- Improved performance of the legacy code.

Developer, Mobile Applications

GE Appliances

March 2021 - May 2022

- Developed an application to diagnose the health check and find faults in home appliances using BLE and classic Bluetooth.
- Converted native Android/iOS code to Flutter to maintain a single code repository.

Associate Developer - Android

Innovapptive Global Solutions Pvt. Ltd. Sept. 2015 - April 2019

- Build multiple products based on SAP mobile platform.
- Design and build zero-code mobile applications.
- Integrated external hardware like barcode scanner, label printer, etc.
- Integrated drones with the app and smart glasses.

PROJECTS

AP Aware [🔗](#)

October 2025 - Present

AWARE is an integrated platform which provides critical alerts and actionable advisories across many sectors for the state of Andhra Pradesh. Serving as a centralized knowledge hub, AWARE aggregates data across multiple domains to support timely decision-making and preparedness efforts. Powered by AI, it provides predictive forecasts and concise guidance for action. It offers district-level alerts for officials and the public.

Mobilewise [🔗](#)

December 2023 - October 2025

Leverage pre-built components and templates to significantly accelerate development cycles, enabling faster time-to-market for your mobile apps. Build custom apps entirely visually. No coding required. The WYSIWYG editor ensures your design translates perfectly into the final product. Enable businesses to tailor the appearance and branding of the product to align with their corporate identity. Automate repetitive tasks and streamline business processes within your mobile apps. Seamlessly connect your apps to existing systems (CRM, ERP) for a unified data landscape.

TRAY [🔗](#)

*May 2022 - November 2023
April 2019 - February 2021*

TRAY is POS software that runs on customized Android devices. Complete with a powerful, cloud-based management and reporting portal, it is one of the most full-featured and easy to use point of sale systems available and it's fully enabled for self-service.

SmartHQ Services [🔗](#)

April 2021 - May 2022

SmartHQ Service allows you to communicate directly with appliances for real-time diagnostics so you can quickly isolate and test components like fans, pumps and more!

RACE Dynamic Form [🔗](#)

December 2018 - March 2019

RACE Dynamic Forms (RDF) is a digital form application, which enables users to collect and send data digitally to their dispatcher/supervisor/manager within the organization.

mInventory [🔗](#)

May 2018 - December 2019

The mInventory mobile app allows your organization to perform cycle counts from the warehouse floor, view and cross-check information across multiple locations, seamlessly transfer assets, and track stock movement with precision across plants and storage locations.

mWorkorder [🔗](#)

July 2017 - October 2018

The mWorkOrder mobile app is a part of the work order management software suite. This tool connects back-end work order management with floor- or field-based technicians to streamline how work orders are assigned, tracked, resolved, and reported.

mWorklist [🔗](#)

November 2015 - July 2017

Agnostic of a system or a transaction workflow, mWorklist (Mobile Universal Approvals) provides managers with a universal one-stop shop to approve all their work items.
